## EuroWindow advocates for feasible procedure of future declaration of thermal transmittance

Frankfurt, January 2025 – The European Commission asked the Member States (MS) about their needs for declared U-values of windows by presenting 5 options to choose from. EuroWindow evaluated the proposals and emphasizes the importance of balancing legislative goals with practicality, cost-effectiveness and industry fairness.

## More facts about Window Replacement

Frankfurt, January 2025 – EuroWindow, European Aluminium, and EPPA have resumed their social media campaign to raise awareness about the role of energy-efficient windows in achieving the EU's climate goals. The campaign, inspired by the findings of the Fraunhofer Institute for Building Physics (IBP) study, continues to share significant insights in the web.

## **EuroWindoor supports the European Commission's efforts in developing generic datasets for environmental sustainability assessments**

Frankfurt, February 2025 – EuroWindoor welcomes the European Commission's initiative to provide manufacturers with cost-effective access to generic datasets. This will ensure harmonization, streamline environmental sustainability assessments and improve data reliability — particularly benefiting SMEs.

## **EuroWindoor reminds again about shortcomings in technical screening criteria of the EU Taxonomy for windows and curtain walling**

Frankfurt, February 2025 – EuroWindoor provided feedback on the EU Platform on Sustainable Finance's draft report regarding the review of the Taxonomy Climate Delegated Act and additional technical screening criteria. It is important to EuroWindoor to support the ongoing revision process to ensure that criteria for windows and curtain walling are aligned not only with the sustainability goals but also with real-world conditions.

---

## **EuroWindoor submits numerous comments on the revised draft Standardisation Request for windows and doors**

Frankfurt, February 2025 – EuroWindoor submitted extensive comments on the revised draft Annexes of the Standardisation Request for windows and doors. The revised draft spans eight Annexes over 70 pages and aims to define the standardisation framework for the product family Doors, Windows, Shutters, Gates and related Building Hardware under the new Construction Products Regulation (EU) 2024/3110 (CPR).

## **EuroWindoor: 10 years of successful commitment to the European window, door and façade industry**

Frankfurt, April 2025 – EuroWindoor AISBL looks back on a successful first decade and celebrates 10 years as a strong voice for the window, door and façade industry in Europe. However, EuroWindoor's roots go back further: a predecessor organisation was founded in 1999 under the same name as a round table of various material associations. In 2015, an international non-profit organisation was established to represent the interests of the industry across all materials.

---

## EuroWindoor Spring Meetings Focus on Sustainability, Innovation and Regulation

Frankfurt, March 2025 – EuroWindoor members gathered for the Directing Council meeting and General Assembly, with a strong focus on the revised Construction Products Regulation (CPR) and the ongoing Technical Acquis process. Key discussions addressed aligning the CPR with modern industry standards to ensure transparent market conditions and foster innovation.

## EuroWindoor calls for more time and clarity on open issues in the Technical Acquis for Windows and Doors

Frankfurt, April 2025 – EuroWindoor highlights unresolved issues in the Technical Acquis process for windows and doors. As a dedicated stakeholder and expert contributor to the upcoming implementation of the new CPR (Regulation (EU) 2024/3110), EuroWindoor stresses the need to address these critical matters before the Request for Standardisation is finalized, and urges political authorities to allow sufficient time.

---

## **EuroWindoor advocates reducing bureaucratic burden of Environmental Declarations under new CPR**

Frankfurt, May 2025 – The forthcoming Construction Products Regulation (EU) 2024/3110 (CPR) will oblige manufacturers to declare environmental sustainability and ongoing considerations for implementation require data for every single product type in the Declaration of Performance and Conformity (DoPC). Because windows are highly customised, as much as 95 % of the windows placed on the European market would each require their own DoPC, creating an enormous administrative burden that particularly hurts small and medium-sized enterprises (SMEs).

## **EuroWindoor members address challenges of the new CPR at Prague meeting**

Prague, June 2025 – EuroWindoor members gathered in the Czech capital for their summer Directing Council meeting to exchange views on national and European developments impacting the window, door, and façade sector.

---

## **EuroWindowor provides input to public consultation on Digital Product Passport rules for service providers**

Frankfurt, July 2025 – EuroWindowor has submitted its contribution to the European Commission’s public consultation on the delegated act defining the rules for service providers involved in the Digital Product Passport (DPP) framework with relevance to construction products.

## **EuroWindowor welcomes the Spanish PVC Window Association (ASOVEN) as new member**

Frankfurt, July 2025 – ASOVEN becomes a new member association of EuroWindowor following the decision made at the Directing Council meeting on 27th June 2025. It represents 85 member companies across the entire PVC window value chain and is an important Stakeholder in Spain’s construction and renovation sector.

---

## EuroWindoor calls for targeted Improvements while supporting the current Standardisation Framework

Frankfurt, July 2025 – EuroWindoor has responded to the public consultation on the revision of the Standardisation Regulation (EU) 1025/2012, expressing strong support for maintaining the existing framework while advocating for targeted improvements to enhance the standardisation process.
